

Dual Stacking Cavity Slider

Dual Stacking Cavity Slider

Clever design by Cowdroy has developed the Dual Stacking Cavity Slider.

Two doors attached, side by side sliding back into the same Cavity Pocket.

A single Cavity Slider requires twice the trim width. By using Dual Stacking, trim width is cut in half which doubles your clear walk through. These features make this product suitable for residential and commercial applications where wall depth is at a minimum.

Doors can be standard height and width, timber or aluminium. If your requirements are for oversized doors please contact Cowdroy.

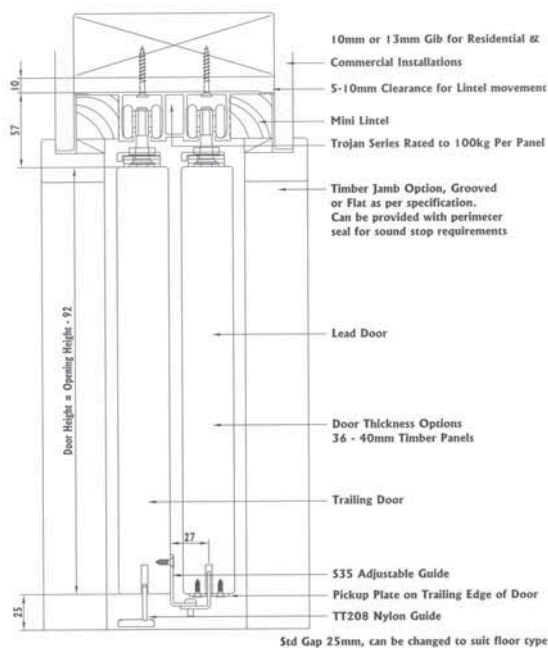

Available as two doors sliding into one Cavity or two pairs of doors separating in the middle and sliding back into opposing Cavity Pockets.

Cowdroy use their Trojan track and carriages which can support up to 100kgs.

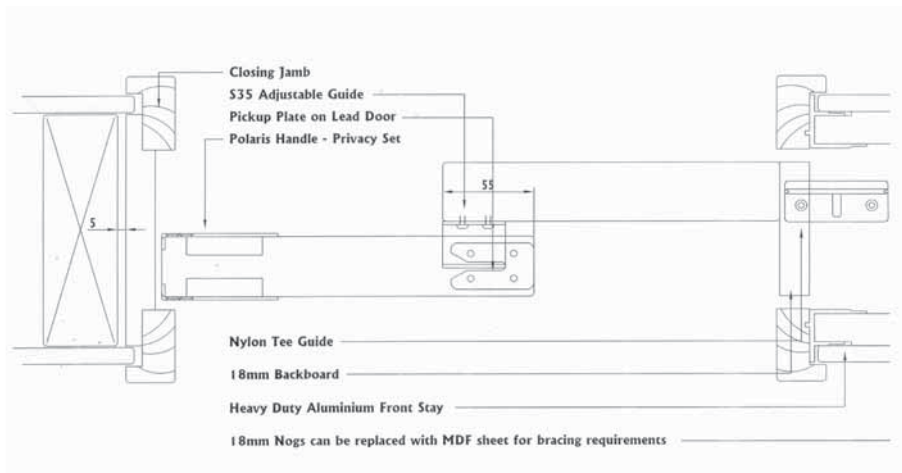

This track and carriage system is renowned for its consistent smooth action and is back by Cowdroys comprehensive ten year warranty.
