

ALLWEATHER SLIDING GLASS CLAMP

New to the **AllWeather Sliding** system is an optional **Glass Clamp** for frame less glass doors. The clamp simply bolts on to the wheel assembly in place of the door mounting bracket to allow the use of a frame less door. The clamp is adjustable to suit glass from 6mm to 10.38mm thick and can carry doors up to 100kg. To compliment the clamp there is an adjustable bottom guide in Stainless Steel. **AllWeather Sliding** is ideally suited to internal doors, partitions and dividers however is also suitable for exposed areas where a sealed system is not required.
