

TRIUMPH CONCEALED DOOR STOP

The **Triumph Sliding** door track system has a new concealed door stop. This slimline stop has been designed with aesthetics in mind. Its moulded nylon design is shaped to fit snugly within the track while the black material is barely visible in-situ. The nylon body features a protruding door bump to one side and recessed screw holes to house 2 x M6x15mm Allen Key pointed screws and hex nuts.

This stop will fit both the new and old Triumph track shapes and will be a standard inclusion in all P30010 and P30510 packaged sets.
